Integration

so easy, so natural

The HVC130 presents businesses with a budget-friendly video conferencing solution perfect for real-time, point-to-point communication. The HVC130 comes equipped with a 5-megapixel PTZ camera and HD720p30fps output for clear, lag-free video. And, by linking the system's unidirectional microphones into a daisy chain, you can enjoy clear audio even in larger, oddly shaped conference rooms. On top of this, AVer has developed a number of handy software add-ons for the HVC series, like ScreenShare, our wireless content sharing software for PCs, and VCLink, our exclusive app for instantly sharing live images and snapshots using your mobile device.

Real-World Benefits

You will notice a marked decrease in travel expenses for your business soon after integrating the HVC130 into your regular routine by cutting back on the time your staff and associates must spend in the air and on the road. In addition to its budgetary advantages, utilizing the HVC130 to conduct meetings, training seminars and presentations is certain to lead to increased inter-office productivity and improved relationships with customers. With these cost effective advantages and more, it's easy to see how this well-equipped, competitively priced video conferencing system from AVer can help to give your company a return on investment (ROI) that keeps its portfolio looking strong.

Daisy Chain MIC Linking

Take a closer look at how 1 to 3 additional unidirectional microphones can be linked to the MIC that comes standard with HVC130 to form daisy chains of between 2 and 4 MICs, giving you the highest quality audio experience with your HVC130.

Free Software Add-ons

VCLink for mobile devices

With this fantastic mobile application, you can wirelessly present live images or snapshots taken with your iPad 2, iPhone or Android-supported smartphone's built-in camera to everyone in the meeting. VCLink can also turn your mobile device into a second remote control so no time is wasted searching for the remote.

ScreenShare for PC

Wirelessly share content from your PC in real-time, giving you the freedom to present files and pictures from your seat so you can focus on your presentation instead of dealing with a mess of different cables.

VCPlayer

With AVer's own video recording playback software, not only can you spontaneously adjust the screen layout of meetings recorded with HVC330 or H300, but also convert the video into a .mov file for playback in other media players.
